

Driverless Hardware

As a formula student team our overall goal is to develop a high performing racecar. Therefore, we try to integrate our sensors in the most beneficial way.

In order to achieve this goal the hardware mountings have to be as light as possible while also not disturbing the airflow significantly.

TASKS

- Construction and manufacturing of hardware mountings
- Cabeling of all sensors and plugs

REQUIREMENTS

Required:

- -

Useful:

- Construction knowledge (CAD)
- Soldering experience

WE OFFER

- Good connections to our industrial partners ans sponsors
- Workshops and seminars
